

Questions on Lambda Functions

1. Write a lambda function to square a number.
2. Write a lambda function to check if a number is even.
3. Write a lambda function to multiply two numbers.
4. Write a lambda function to return the larger of two numbers.
5. Write a lambda function to find the absolute value of a number.
6. Write a lambda function to check if a string is a palindrome.
7. Write a lambda function to calculate the cube of a number.
8. Write a lambda function that returns the length of a string.
9. Write a lambda function to check if a number is positive.
10. Write a lambda function to convert Celsius to Fahrenheit.
11. Write a lambda function using map to square all elements in a list.
12. Write a lambda function using map to convert all strings in a list to uppercase.
13. Write a lambda function using map to round off float numbers in a list.
14. Write a lambda function using map to get the last character of each string in a list.
15. Write a lambda function using map to calculate discounted prices (10% off) from a list of prices.
16. Write a lambda function using filter to select only even numbers from a list.
17. Write a lambda function using filter to find strings longer than 5 characters.
18. Write a lambda function using filter to find all palindromes in a list of strings.
19. Write a lambda function using filter to extract positive numbers from a list.
20. Write a lambda function using filter to get all emails that end with "@gmail.com".
21. Write a lambda function using reduce to find the sum of all elements in a list.
22. Write a lambda function using reduce to find the product of all elements in a list.
23. Write a lambda function using reduce to find the longest word in a list of words.
24. Write a lambda function using reduce to find the minimum value in a list.
25. Write a lambda function using reduce to concatenate all strings in a list into a single sentence.

26. Write a lambda function using map to prefix "Mr." or "Ms." to names based on a gender list.
27. Write a lambda function using filter to return only prime numbers from a list.
28. Write a lambda function using map to extract domain names from email addresses.
29. Write a lambda function using map to apply a grading curve (+5 marks, max 100) to a list of student scores.
30. Write a lambda function using reduce to count the total number of characters in a list of strings.
