

Simple Iterations and Number Manipulations

1. Write a program to print the square of numbers from 1 to 10.
2. Create a program to display the first 10 multiples of 3.
3. Write a program to print all the numbers divisible by 5 within a given range.
4. Display numbers from 50 to 0, decrementing by 5.
5. Write a program to calculate and print the factorial of a given number using a `for` loop.
6. Create a program to display the cube of numbers from 1 to 15.
7. Write a program to print all the prime numbers up to a given number.
8. Create a program to count and display the number of even numbers in a given list.

String Manipulations

9. Write a program to print each character of a string on a new line.
10. Create a program to count the number of vowels in a given string.
11. Write a program to count the number of uppercase letters in a string.
12. Create a program to print the ASCII value of each character in a string.
13. Write a program to display the reverse of a given string.
14. Create a program to print only the digits present in a string.
15. Write a program to print the index of each character in a string.

List Operations

16. Write a program to count the number of positive numbers in a list.
17. Create a program to display the minimum value in a list.
18. Write a program to calculate the product of all numbers in a list.
19. Create a program to display all the negative numbers in a list.
20. Write a program to display all numbers greater than 50 in a list.
21. Create a program to remove all duplicates from a list.
22. Write a program to print the sum of only even numbers in a list.

Range and Series

23. Write a program to display numbers from 1 to 100 that are divisible by both 2 and 3.
24. Create a program to print the Fibonacci sequence up to a given number.
25. Write a program to display the first 10 terms of an arithmetic progression with a given first term and common difference.
26. Create a program to display numbers from 1 to 50, but skip every 5th number.
27. Write a program to print the squares of all odd numbers from 1 to 30.

Custom Logic

28. Write a program to print all the leap years between 2000 and 2100.
29. Create a program to calculate the sum of the digits of a given number.
30. Write a program to display numbers from a list that are palindromes.

Miscellaneous

31. Write a program to display the binary equivalent of numbers from 1 to 10.
32. Create a program to print the factorial of the first 5 natural numbers.
33. Write a program to count the number of elements in a list greater than a given threshold.
34. Create a program to check if a number from a list is divisible by 7.
35. Write a program to display the first 10 terms of a geometric progression with a given first term and ratio.
36. Create a program to print the sum of numbers at even indexes in a list.
37. Write a program to display all unique characters from a given string.
38. Create a program to print all numbers up to a given number in reverse order.
39. Write a program to print the cumulative sum of numbers from 1 to a given number.
40. Create a program to print the first 10 square numbers starting from 1.
